SELECTED PROJECTS

CleanSpark – Cleaning Service Management System

Full-stack web application designed to manage cleaning-service customers, bookings, staff, payments and reporting. Implemented customer registration/login, booking and tracking workflows, role-based access, email OTP, JWT authentication, REST APIs and MySQL database integration using HTML/CSS/JavaScript, Bootstrap, Node.js and Express.js.

Local Administration Management System (LAMS)

Web-based local administration system for citizens and administrators. Features include citizen services, applications, payment tracking, announcements, messaging, profiles, document handling and Super Admin management using a Node.js/Express/MySQL backend.

Personal Developer Portfolio

Professional responsive portfolio website presenting education, technical skills, projects, achievements and contact information, built with separate HTML, CSS and JavaScript files and maintained with Git/GitHub.

School Staff Management system(rassaly)

Full-stack web application for managing school staff, attendance, payroll, leave requests and HR operations. Implemented Admin, HR and Employee role-based access, email OTP and JWT authentication, GPS/geofenced attendance, payroll and payslip management, permission workflows, notifications, reporting and REST APIs using HTML, CSS, JavaScript, Node.js, Express.js and MySQL.
